Is it because you aren't burdened by big government that you are able to perform such magic? Thanks for sharing this!

This lab info is extremely useful and I have shared with our lab folks, who have also been looking into this. They will determine if they can analyze and/or broker for others to perform the work. I think if we take the lead, we may be able to figure out reimbursement through the network, but no guarantee.

Patti Kay

Subject: NATIONAL WARN Request: Lab Support Needed in WV

NATIONAL WARN NOTICE - WIDE DISTRIBUTION

Many of you have likely seen reporting on the chemical spill in Charleston, WV which has impacted the drinking water for the American Water's treatment and distribution systems.

I received a request from American Water that they are seeking additional mobile lab support that can run samples for decision making support as they begin to take actions to clear the system.

The method and equipment specifications are attached.

Equipment - ThermoFisher GC/MS unit utilizes SM 524. The attached files includes the protocol utilized by Eastman, the chemical producer.

If you have this capability please contact Nick Santillo, American Water, for further details and logistical arrangements.
